■ the departments within our organisation

Qinhuangdao Shuanglun Environmental Protection Technology Co., Ltd.

■ the objectives of our proposal

1、 Small life sewage treatment technology

It is suitable for that the sewage pipe is hard to centralized reach. The automatic equipment of decentralized construction, decentralized management, high automation.

2、 Pure natural sewage treatment agent

It is suitable for small rivers, sewage, fish ponds, non-toxic and taste and can be degradative.

Qinhuangdao Shuanglun Environmental Protection Technology Co., Ltd.

- The idea of the partnership

To learn advanced technology of water treatment in Spain

- Cooperation intention

To import advanced technology of water treatment from Spain

- Areas of cooperation in technology

Water treatment related

- Method of cooperation

Joint venture、cooperation、Technology import ,
To jointly develop the Chinese market.
