

FLASH PRESENTATION

Overview

*From conceptual engineering to
commissioning*

AZCATEC is an **engineering and construction** SME company oriented towards the design, optimization, and construction of industrial, environmental, and energy plants. AZCATEC takes pride in its **innovative** qualities and efficiency within the **international** business world.

Our founding partners, with more than 25 successful years of professional development, have allowed us to create a business model that is **oriented towards the client**. This technological and innovative model makes the company a **strategic partner** in a competitive business world.

RTD strategic lines

AZCATEC continues with the same spirit of innovation and experience with which it was created. So this spirit is paramount in key sectors including industry, energy, and environment.

OBJECTIVES & COOPERATION AREAS

Project proposal

- Plastic to fuel & Waste to energy
- Develop CCP for environmental & industrial small applications

Expertise offered

- Basic, process and detailed engineering
- Equipment design
- Develop pilot plants
- Develop industrial plants
- Scaling-up and new process industrialization
- Facilities and utilities for industrial plants

Cooperation areas

- Special waste treatment
- Deodorization
- Thermal and power use of landfill biogas (lixivate)
- Bio-methanization and biogas production
- Biomass
- Waste to energy / Waste to fuel
- Water & desalination
- Scaling-up and process industrialization

GENERAL CAPACITIES & SERVICES

Capacities

Chemical and oil & gas industry
Renewable energies & biofuel
Cogeneration
Mining
Water, waste & environment
Agro food
Industrial construction
Infrastructures & logistic
Energy advaced servicies
Utilities & off-site

Services

**Core &
conceptual
engineering**

**Process
engineering**

**Detail & design
engineering**

**Equipment &
systems
engineering**

**Electric
engineering**

**Instrumentation
engineering**

**Procurement &
Supplier
management**

**Construction
site
supervision &
startup
assistance**

**Turn-key
projects**

PARTNERSHIP

- Partners to bilateral or multilateral projects R & D
- Partners to participate in major projects
- Technology suppliers for new projects
- Distribution arrangements in Europe and Latin America
